BUILT TO **expand** ON FAMILY FUN

JAY FEATHER SLX

JAY FEATHER

For 45 years, Jayco has helped create generations of family fun, and over the course of that time, fun still looks remarkably the same. From campfires to fishing, from relaxing to eating, fun has the same feel generations later—and all with a Jayco RV nearby. Today, we're the largest family-owned RV manufacturer in the world, and our promise is to continually strive to build family-friendly products that will outlast just about everything but your memories. Join us in our generations of family fun.

On the cover: The 1986 brochure artwork, illustrated by Tim MacDonald, was part of a successful ad campaign. These illustrations inspired the 2015 Jayco brochure covers, which are live re-creations of Tim's artwork.

Part travel trailer, part Swiss army knife, the 2015 Jayco Jay Feather is packed with everything your family needs in an ultra lite, expandable design, meaning you can live large, tow small and fold out for loads of fun.

AT THE CAMPSITE

Jay Feather is a hybrid model, blending the comforts of a hardwall travel trailer with all the fun that tent camping provides. Our tent system sets up in four easy steps.

- 1** Unlatch the bed platform.
- 2** Guide the bed platform down (far left).
- 3** Insert the bed bow brace (left).
- 4** Make the bed!

close for towability [Travel-friendly lengths]

open for amenities [More standard features]

ON THE ROAD

When it's time to pack up, room-making tent ends fold in for a more compact design. Jay Feather's travel-friendly lengths and legendary lightweight floorplans make this travel trailer towable by most minivans, crossovers and SUVs.* Independent rubberized suspension and E-Z Lube axles complete this towable package.

* Consult with your authorized automobile manufacturer or vehicle owner's manual; some models require a tow package.

JAY FEATHER SLX 18SRB

Jay Feather SLX

Fun-sized for families

Jay Feather SLX makes it fun to live lightly. Weighing in under 3,330 pounds, our newest (and lightest) Jay Feather is towable by most minivans and crossovers,* delivering everything you need for your next on-the-go adventure.

* Consult with your authorized automobile manufacturer or vehicle owner's manual; some models require a tow package.

* The weights of certain options and/or option packages are not included in the UUV listed in the specification charts.

Unloaded Vehicle Weight (UUV): Sometimes referred to as "Dry Weight," UUV means the typical weight of this trailer as built at the factory. The UUV, as used in product literature and other promotional materials, does not include cargo, fresh water, propane, options or dealer-installed accessories.

Gross Vehicle Weight Rating (GVWR): GVWR means the maximum permissible weight of the trailer, including the UUV plus passengers, personal items, all cargo, fluids, options, and dealer-installed accessories. The GVWR is equal to or greater than the sum of the UUV and the CCC.

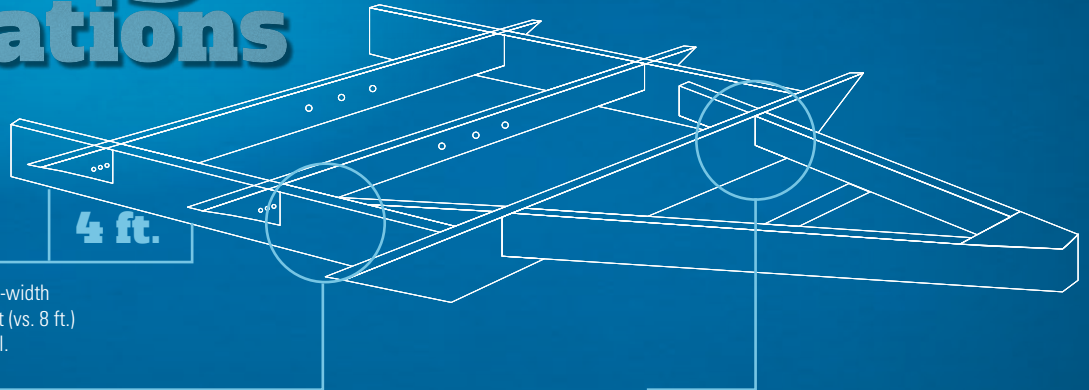

Cargo Carrying Capacity (CCC): CCC means the maximum weight of all passengers, personal items, food, fresh water, propane, tools, other cargo and dealer-installed accessories that can be carried by the trailer. CCC is equal to or less than GVWR minus UUV. The addition of options will decrease the CCC.

Hitch Weight (HW): The hitch weight, as used in product literature and other promotional materials, does not include cargo, fresh water, propane gas, options or dealer-installed accessories. The addition of these types of items will either add to or subtract from the stated hitch weight.

It is important for your safety and enjoyment that your tow vehicle be adequately sized and equipped to tow and handle the GVWR of the RV you select. Review weights and rating of your tow vehicle and consult a competent advisor for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your tow vehicle before heading out on the roadways. When you tow an RV, you must drive differently than when you drive a single vehicle. Practice hooking up, driving, backing up and braking in a safe environment or seek out professional instruction. Jayco affixes a weight label to each RV which lists weight information for that vehicle. See specifications chart above.

WE START WITH ONE OF THE INDUSTRY'S **strongest** foundations

Jayco builds on custom-sized frames, designed specifically for each floorplan. Other manufacturers use stock frames, stretching and welding the frame to fit.

Full-width outriggers: We build on full-width outriggers that are spaced 4-6 feet apart (vs. 8 ft.) to better support the weight of the wall.

Norco NextGen frame: Jay Feather features the industry's strongest strength-to-weight ratio thanks to a Norco NextGen frame made of high-strength, low-alloy sheet steel, huck bolts and an interlocking design (n/a SLX).

Integrated A-frame: The A-frame runs through the main frame, preventing the hitch from buckling like competing tack-welded designs.

– so that we can build the industry's most reliable RV

JAYCO'S ROOF **vs** OTHER ROOFS

4,500 LBS. ON A JAYCO ROOF VS. OTHER ROOFS

THE MAGNUM TRUSS ROOF SYSTEM **50 percent stronger**

In a side-by-side comparison test, Jayco's exclusive Magnum Truss Roof System withstood 4,500 lbs. — 50 percent more than other roofs. The difference?

- ① The walls and floor are vacuum bonded using 15-18 minutes of 144 tons of pressure to ensure a strong bond. (SLX floors feature screwed construction with wood joists.)
- ② Lightweight materials, like welded aluminum frames with metal backers, and Jay Feather's innovative, aerodynamic profile increase towability.
- ③ Extra-wide corner seals on the entry doors, baggage compartment and window seals prevent leaks.
- ④ Jay Feather's water-repellent vinyl tent material resists mildew, mold, scratches and cracks, while the double-stitched design adds strength.
- ⑤ A reversed-cambered support system creates a durable structure rated to hold 1,100 lbs., while a permanent tent-to-bunk attachment system with channel locks eliminates misplaced poles.
- ⑥ The hook tent frame creates more headroom in the bunk area compared to competing tents.
- ⑦ Jayco uses crowned wood trusses, solid-wood studs and oversized nail plates to maximize the roof's load capacity.
- ⑧ Then, we screw down 3/8" roof decking at every seam, a process that is more durable than stapled construction.
- ⑨ Finally, our one-piece, sidewall-wrapped DiFlex II material provides the ultimate in leak protection.

The fun starts with your local Jayco dealer

Your local dealer

From giving advice to selling and servicing products, we consider our loyal dealers the glue in our family bond. Establishing a solid relationship with your local Jayco dealer is a key component in the enjoyment of your new Jayco. By purchasing from a local dealer, you will have a convenient location for sales, parts and service support. We hope you consider them a part of your camping family.
