Unloaded Vehicle Weight (UVW): Sometimes referred to as "Dry Weight," UVW means the typical weight of this trailer as built at the factory. The UVW, as used in product literature and other promotional materials, does not include cargo, fresh water, LP gas, options, or dealer-installed accessories.

Gross Vehicle Weight Rating (GVWR): GVWR means the maximum permissible weight of the trailer, including the UVW plus passengers, personal items, all cargo, fluids, options, and dealer-installed accessories. The GVWR is equal to or greater than the sum of the UVW and the CCC.

Cargo Carrying Capacity (CCC): CCC means the maximum weight of all passengers, personal items, food, fresh water, LP gas, tools, other cargo, and dealer-installed accessories* that can be carried by the trailer. CCC is equal to or less than GVWR minus UVW.

*The addition of options will decrease the CCC.

It is important for your safety and enjoyment that your tow vehicle be adequately sized and equipped to tow and handle the GVWR of the RV you select. Review weights and rating of your tow vehicle and consult a competent advisor

for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your tow vehicle and the RV together before heading out on the roadways. When you tow an RV, you must drive differently than you do when driving a single vehicle. Practice hooking up, driving, backing up, and braking in a safe environment or seek out professional instruction.

See specification chart above. Jayco affixes a weight label to each RV which lists weight information for that vehicle.

2005 JAY FLIGHT™ Travel Trailers and Fifth Wheels

We Build It To Last.

Like every Jayco recreational vehicle, the Jay Flight features rugged designs, high quality materials, and expert construction methods. At the heart of it all is Jayco's I-Class structural steel chassis frame, which is stronger and more durable than the welded I-Beam frame used by many competitors. When you choose the Jay Flight, you'll enjoy the quality both today and down the road.

(Left) End view of Jayco's I-Class™ structural steel chassis frame.

(Right) End view of the welded I-beam frame used by many competitors which is subject to warping.

A Legacy of Craftsmanship.

Jayco has been blessed with some of America's finest craftsmen who make Middlebury, Indiana and the Jayco plant their home and workplace. Generation after generation, a legacy of tried-and-true construction methods is passed down, continuing the tradition of quality and durability that has helped Jayco grow into a true industry leader.

We Back What We Build.

The Jayco 2+3 Warranty is a manufacturer's limited warranty. It doesn't come from your dealer and it's not an extended warranty! It comes from the people who build Jayco recreational vehicles to the people who buy them. Each Jayco is warranted to the original purchaser for twenty-four (24) months from the date of purchase against defects in materials and workmanship. The Jayco warranty includes a limited three-year (3) structural guarantee and, in addition, our limited warranty may be transferred one time within the first two (2) years. Go ahead and compare the Jayco warranty with other manufacturers' warranties. You'll find it's the best in the business!
